Process Train Supervisor - 50702311

WACKER SILICONES is one of the world's leading silicone manufacturers with silicone-based system solutions with more than 3,000 different products - silicone fluids, rubbers and resins, silanes and pyrogenic silica. At our Adrian, MI site, we are currently looking for a Process Train Supervisor.

The Process Train Supervisor is responsible for the oversight of assigned process equipment to ensure safe and timely production to meet customer demand in a quality manner.

Your tasks:

- Create and maintain Equipment Operating Instructions (EOI) for all equipment of responsible processes
- Conduct training of all operators who work on this equipment accordance with these EOI's
- Provide appropriate SAP training
- Partner with production scheduler to ensure the production schedule is achieved that best satisfies customer demand
- Ensure compliance with all company systems and procedures
- Enforce all company systems and procedures including management of change, ISO, safety code of conduct, plant and department rules, safety SOP's, emergency action manuals
- Maintain equipment by meeting with the maintenance department and engineering staff to prioritize and schedule maintenance work
- Identify the need and frequency for maintenance PM's with the assistance of maintenance and engineering
- Evaluate operator suggestions for improved operation and execution of operator suggestions that make operational and economic sense
- Function as main representative on investment projects
- Coordinate with maintenance and contractors to perform defined repairs and process changes
- Spearhead continuous improvements for Safety, Quality, and Productivity
- Troubleshoot equipment problems
- Coordinate with Process Chemists, Chemist of Record, Engineers, etc. to address issues

Your profile:

Knowledge, Skills, and Abilities

- Knowledge and understanding of batch and continuous chemical processes, as well as ancillary systems such as steam jet and mechanical vacuum systems preferred
- Understanding of process control systems
- Mechanical aptitude
- Sound communication skills
- Troubleshooting skills for quality and equipment issues
- Basic computer skills
- Time management and interpersonal skills

Education and Experience

- Bachelor's degree in related field
- Supervisory experience (1-3 years), in manufacturing preferred
- Experience in chemical processing - batch and continuous

Physical Demands

Frequent:

- Standing
- Walking
- Exposure to hazards and atmospheric conditions

Occasionally:

- Exposure to extreme cold, temperature changes, dampness, humidity
- Noise
- Sitting
